Technologies: API Integration (SAP, ABN Lookup, XERO, Eversign, Google API), jsPDF, AG Grid

Soft Skills: Problem Solving, Communication, Team Collaboration, Agile Methodology

Specialized Tools: SEMrush, Ahrefs, SurveyJS

Experience

AAI WORLDWIDE LOGISTICS

Application Developer | November 1, 2024 – Present

- Contribute to the development and enhancement of the company's financial management system, ensuring robust functionality and reliability.
- Design and implement key features, including journal voucher creation, sundry expense invoice processing, inventory management, and comprehensive reporting using Ag-Grid for data visualization and jsPDF for advanced report generation.
- Facilitate the integration of orders from the SAP system into the Warehouse Management System (WMS) by converting XML data to JSON format, generating updated XML files, and managing their secure transfer via SFTP for SAP validation.
- Assist in the development of CRM system maintenance modules, incorporating features for managing Airline Rates, IATA Rates, and associated charges.
- Create dynamic and customizable forms using SurveyJS, enabling efficient template creation tailored for Customer Service Representatives (CSR).
- Develop a Trucking Rates module within the Trucking Management System, utilizing Vuetify for intuitive frontend design and Laravel for backend logic.
- Participate in the development and maintenance of applications utilizing technologies such as PHP, Laravel, Nuxt.js, Vuetify, and Vue.js, with integrations to enhance functionality through third-party APIs.
- Collaborate with cross-functional teams to ensure seamless system updates, continuous improvements, and adherence to best practices in software development.

OCTAL PHILIPPINES INC.

SOFTWARE DEVELOPER | October 24, 2022 - October 31, 2024

- Assigned to AAI Worldwide Logistics as part of the IT Department, contributing to the development and enhancement of core systems, including the Financial Management System (FMS), Customer Relationship Management (CRM), Transportation Management System (TMS), and Warehouse Management System (WMS).

-
- Developed a Trucking Rates module for the TMS, utilizing Vuetify for an intuitive frontend interface and Laravel for backend functionality.
 - Assisted in the creation of a TMS dashboard for the transport team to monitor truck availability, track deployed truck numbers, and analyze booking frequencies. Integrated visual elements such as graphs, filters, and other data visualization tools to enhance truck management and decision-making.
 - Enhanced the Logistics Execution System (LES) user interface using Vue.js for dynamic interactions, Ag-Grid for flexible data presentation, and jsPDF for seamless report generation.
 - Integrated the FAREYE API to update customers on package statuses managed by third-party providers, improving transparency and real-time tracking capabilities.
 - Designed and implemented a single-page package tracker application, providing users with an efficient and user-friendly interface for monitoring package deliveries.

URATEX PHILIPPINES

FULL STACK DEVELOPER | March 28, 2022 - October 05, 2022

- Designed and developed surveys using Laravel, incorporating detailed reporting functionalities to analyze demographics and other critical survey factors.
- Created a Trip Management System to facilitate efficient scheduling and booking of company vehicles, improving resource management and accessibility.
- Collaborated with cross-functional teams to design and develop the company's landing page, ensuring a seamless user experience and alignment with branding objectives.
- Developed a dynamic landing page for the company's basketball association, featuring a live countdown timer, leveraging the Statamic content management system for enhanced functionality and ease of updates.

LUMINA HOMES

MARKETING STAFF (FULL STACK DEVELOPER) | March 10, 2021 - March 30, 2022

- Develop, maintain, and optimize websites, landing pages, and applications to support and enhance marketing campaigns effectively.
- Enhanced the property listing loan calculator on the website, enabling public users to compute amortization details based on their inputs and receive the results via email.
- Collaborate closely with marketing teams to understand campaign objectives and deliver tailored technical solutions that drive results.
- Optimize and maintain the performance and functionality of the real estate website built on SilverStripe, ensuring a seamless user experience.
- Prioritize site visibility by implementing SEO best practices, utilizing tools like SEMrush and Ahrefs to manage and optimize SEO strategies efficiently.
- Continuously explore emerging technologies, marketing tools, and industry trends to recommend and implement innovative solutions that support business goals.

SWITCH CONNECT PTY LTD

JUNIOR WEB DEVELOPER | August 5, 2019 - September 28, 2020

- Contributed to the development of modules for the company's ERP system, enhancing functionality and optimizing business processes.
- Integrated Google Maps for address validation in user accounts, ensuring accurate and reliable location data.
- Implemented ABN Lookup for company validation, enabling seamless verification of Australian-based companies through an authorized API.
- Integrated Xero for efficient financial management, allowing for receipt generation and order monitoring to streamline accounting and order processes.
- Incorporated Eversign for document generation, enabling multiple parties to sign and approve documents online, enhancing process credibility and operational efficiency.

Education**TRIMEX COLLEGES****BS in Information Technology**

Earned a 1.50 GPA and completed relevant coursework in web development, database management, and programming.

Communication
